

The NEW 'A' Rated Window

FACT

100%
of a PVC window is
made of recyclable
material making it
extremely
sustainable.

FACT

PVC
is predominantly
delivered from
common salt, which
is an abundant
natural
resource.

PVC AWARE.ORG

The PVCAware.org campaign is an initiative from the British Federation's Windows Group to promote awareness of the versatility of PVC as a material and also of PVC-U windows.

RECYCLING

Polyvinyl Chloride (PVC) has received a lot of bad press in recent years, branded as unsustainable and harmful to the environment. This is simply NOT true.

Products made from PVC can be recycled over and over again. This means that your old PVC windows and the waste from your new ones can all be used from years to come.

COST SAVING COMPARISON

GGF ENERGY CALCULATOR 08

PROPERTY TYPE	EXISTING WINDOWS	1ST YEAR SAVING (£)	20 YEAR SAVING (£)	20 YEAR SAVING (CO2)
DETACHED (20M2)	Single	£247.11	£14,153	40.56
	Double	£193.67	£11,092	31.79
SEMI (15M2)	Single	£185.33	£10,615	30.42
	Double	£145.26	£8,320	30.42
TERRACED (12M2)	Single	£148.27	£8,429	24.34
	Double	£116.20	£6,655	19.07
ALL HOUSING	All	£2.8 Billion	£160 Billion	281 Million

FACT
15%
 of a households yearly CO2 emissions can be cut simply by fitting energy efficient windows.

EST
 stands for Energy Saving Trust, from who all our windows are recommended by.

UNDERSTANDING ENERGY RATINGS

You don't get much for free these days but 'free heat' is exactly that. Rooms can be heated naturally from exterior light and warmth, so long as you have the right windows.

Here is the best bit. Making the most of 'free heat' will significantly reduce your outgoings year upon year.

WHY CHANGE YOUR WINDOWS?

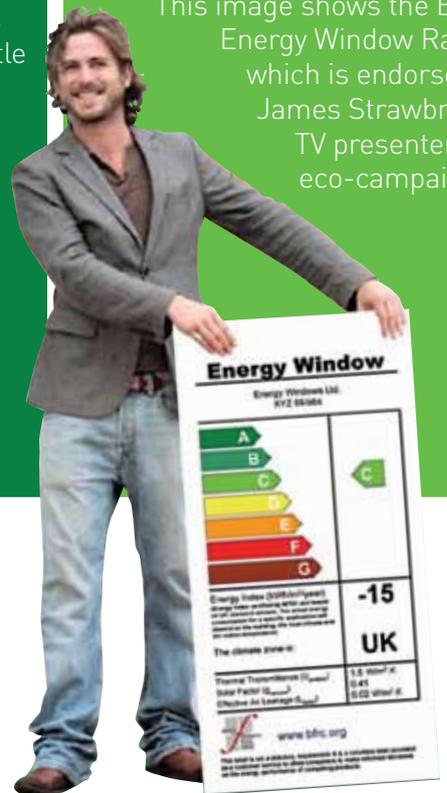

So, you've fitted energy saving light bulbs, you recycle as much as possible and you never boil the kettle with more water than you need. Now we have made these small steps we must start making great strides.

You could buy an energy saving fridge, freezer, dishwasher, and television. And also draught proof your entire house and still not save as much energy or money per year as you would with a set of energy rated windows!

WHAT IS BFRC?

The BFRC scheme is the UK's national system for rating the energy efficiency of windows and is recognised within the Building Regulations as a method to show compliance for your replacement window installations.

This image shows the BFRC Energy Window Rating, which is endorsed by James Strawbridge. TV presenter and eco-campaigner.
