VEKA now offers its market leading range of profiles in a choice of **FOUR** beautiful woodgrains and **FOUR** colours

To complement the existing range of woodgrains available in **Golden Oak, Rosewood and White**, **VEKA** has now launched the realistic **Irish Oak** effect.

Colour me happy!

PVC-U woodgrains have the classic look of timber, while offering all the benefits of modern materials – low maintenance and lasting good looks.

Quality PVC-U windows, unlike wood frames, will not crack, split or warp and require no more maintenance than an occasional wipe with soapy water.

With four realistic woodgrains ranging from fresh White and the contemporary Irish Oak, to warm Golden Oak and dramatic Rosewood – **VEKA** can provide a foiled window profile to suit any style of home.

All profile offered with a woodgrain finish on the outside, is available with the option of white interior for a bright finish within the home.

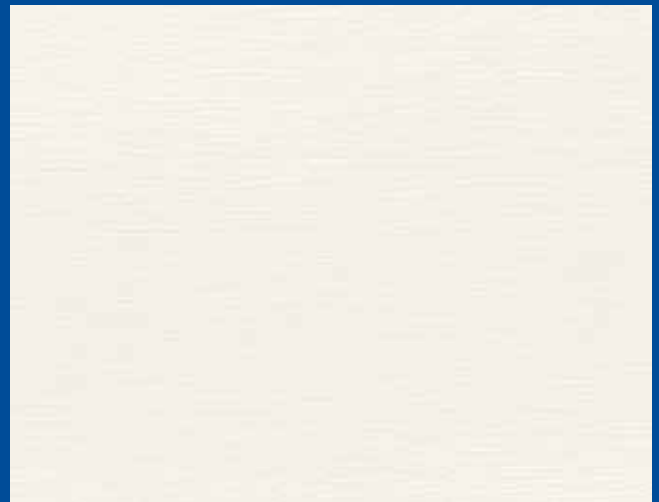

As well as lustrous woodgrain effects, **VEKA** also offers a range of colours to suit any style of building.

Forget the thankless task of continual sanding and painting – hard-wearing foiled profiles are available in modern Black and Grey, soft Ivory and distinctive Dark Green, and require virtually no maintenance.

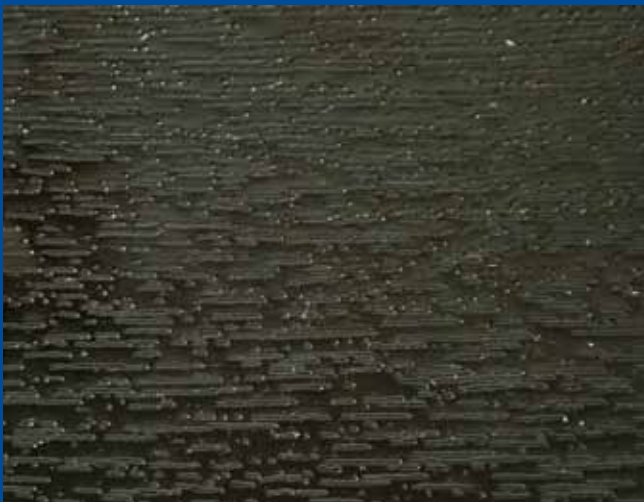

VEKA profile in woodgrains and colours allows a property's personality to shine through.

Dark Grey RAL number 7016

Ivory RAL number 1379

Black RAL number 8022
